Title: Days in a Month
Author: Vitaliy Shydlonok
Date: October 15
Course & Section: CSC 109-101W

Description: Prompts for the name of a month. Determines how many days are in that month. Then displays the number of days in that month.

Initial Algorithm:

1. Get the month
2. Determine how many days are in that month
3. Display the number or days

Data Requirements:

Input:

- Month

Output:

- Days

Additional Data: None

Formulas: None

Refined Algorithm:

1. Input Month
2. IF Month is "February" THEN
    - Days = 28
3. ELSE IF Month is "April" OR Month is "June" OR Month is "September" OR Month is "November" THEN
    - Days = 30
4. ELSE
    - Days = 31
5. END IF
6. Output Days
